

# Aloemannan

Immune Support from the "Father of Aloe"

Holistic Health  
Refined with  
Research

True to our heritage, we provide solutions that sustain and advance natural health and wellness. We combine the best of nature with responsible, smart science to deliver exclusive products with effective results. With over 25 years of research experience, RBC Life understands and improves the strength of nature so we can deliver it to you.

item #1700 - 60 vegetable capsules

### Key benefits:

- Helps strengthen immune system\*
- Soothes entire digestive system\*
- Helps improve conditions for enhanced nutrient absorption\*

### What is it?

Aloemannan is an exclusive, high quality Aloe vera in a capsule form.

Aloemannan provides powerful support to the immune system and is an excellent tonic for the entire digestive system.\*

### Who may benefit?

Everyone can benefit from additional immune support. Those with mild digestive health complaints may also benefit from Aloemannan.\*

### How is it used?

Two capsules of Aloemannan per day.

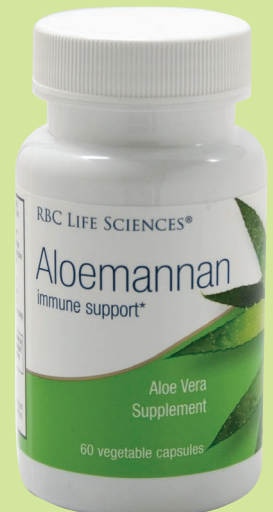

### The Aloe vera story

Aloe vera was used by physicians for thousands of years until the 1900s, when synthetic drugs began to replace natural remedies. Medical science did not know what made Aloe vera so effective until RBC Life Sciences founder, Clinton Howard, began the first major research project to reveal the chemistry of aloe.

Over the next five years, his research led to the isolation of aloe's components and revealed to the world its numerous healthful properties. Unfortunately, many of the aloe juices that have emerged on the market are not effective because they are not processed properly. However, RBC Life brings you the finest, organic Aloe vera juice available today. Our unique process retains the integrity of the rich aloe gel to ensure that you benefit from this legendary botanical. With Aloemannan, you receive all the benefits of this unique aloe juice in a capsule form, with only the water removed.

### Health benefits of natural aloe gel

Many people know aloe as a topical treatment for minor burns, sores, bites and other skin irritations. Aloe vera is all that and more. Consuming aloe on a regular basis may help to support the body's immune system in a profound way.\* A great deal of research shows that the Aloe vera plant holds a variety of immune-supporting properties within its leaves. The active ingredients are the polysaccharides, particularly the acetylated mannans. Reports continue to reveal the healthful properties of these plant compounds.

FROM RBC LIFE SCIENCES®

- See Over -

Aloe vera gel has been shown to act as a powerful antioxidant, particularly against free radicals that can damage fragile DNA. Animal studies have shown that aloe may help enhance natural resistance to bacteria, parasites and fungus.\*

#### Aloe vera:

- Soothes the digestive system\*
- Improves gastrointestinal flora (friendly bacteria)\*
- Reduces yeast and bacterial putrefaction in the colon\*
- Improves elimination\*
- May act as a naturally mild antacid\*
- May improve protein digestion when taken with meals\*
- Reduces bloating and flatulence after meals, indicating improved function of colonic bacteria\*
- Enhances the bioavailability of vitamins E, C and B12\*

#### Why Aloemannan is superior

Once the biological properties of the gel were revealed, commercial methods of aloe preparation were shown to actually reduce or damage the natural make-up of Aloe vera gel. RBC Life manufacturer techniques include:

- NO large pulp filtration: this removes a large portion of natural ingredients.
- NO high temperature concentration: this removes water soluble ingredients; products are often mislabeled as “concentrate.”
- NO whole leaf process: contaminates juice with sap; falsely labeled as “polysaccharide enhanced” or “cold process,” even though the gel has been heated.
- NO enzymes added: enzymes break down the polysaccharides; Irish moss is added to artificially reproduce the thickness of real aloe.

We have improved the processing of Aloe vera. We begin with prime grade, freshly harvested organic aloe leaves. We remove the skin and sap, mill to a liquid and process the gel with proprietary methods that block the enzymatic breakdown of aloe. To ensure the safety of our aloe, we implement a process called Flash Pasteurization. This quickly heats the product to eliminate any possibly harmful bacteria without denaturing the polysaccharides. Then it quickly cools to retain the aloe’s nutritional quality. Our exclusive methods retain the integrity of the aloe gel. Next, the water is removed to convert this liquid into a powder and it is then encapsulated as Aloemannan. Our Aloe vera is approved by the International Aloe Science Council, which sets the standard for the aloe industry.

### Supplement Facts

Serving Size: 2 Capsules  
Servings Per Container: 30

Amount Per Serving	% Daily Value
Aloemannan (Aloe Vera gel powder 200:1)	300 mg †

† Daily Value not established.

**Other Ingredients:** Calcium carbonate, lecithin, flaxseed meal, calcium caseinate, microcrystalline cellulose, magnesium stearate, vegetable capsule (hypromellose, water)
