# TruAloe®

## Immune Support from the "Father of Aloe"

### Key Benefits:

- Helps boost immunity\*
- Eases digestion\*
- Enhances nutrient absorption\*

### What is it?

TruAloe is the finest aloe vera juice available from the "Father of Aloe" himself - our Founder, Clinton Howard. TruAloe contains only organic aloe leaves, carefully processed to ensure that you receive the true health benefits of this incredible plant.

### What is it formulated to do?

This delicious juice provides powerful support to the immune system and is an excellent tonic for the entire digestive system.\*

### Who may benefit?

Anyone who wants to support their immunity or in need of a natural solution for digestive health complaints can benefit from TruAloe.\*

### How is it used?

We recommend drinking 2 ounces of TruAloe daily and increasing as needed. Many people enjoy mixing TruAloe with OliViva® for maximum benefit.

### The Aloe vera story

Aloe vera was used by physicians for thousands of years until the 1900's when synthetic drugs began to replace natural remedies. While many homes still held on to their prized aloe plants, we did not know what made it so effective until RBC's founder, Clinton Howard, began the first major research project to reveal the chemistry of aloe.

Over the next 10 years, his research led to the isolation of aloe's components and revealed to the world its numerous healthful properties. Unfortunately, many aloe juices that have emerged on the market are not effective because they are not processed properly. However, RBC Life brings you the finest, organic aloe vera juice available today. Our unique process retains the integrity of the rich aloe gel to ensure that you benefit from this legendary botanical.

## Health Benefits of Natural Aloe Gel

Many people know aloe as a topical treatment for minor burns, sores, bites and other skin irritations. Aloe vera is all that and more. Drinking aloe juice may help to support the body's immune system in a profound way. A great deal of research shows that the aloe vera plant holds a variety of immune supporting properties within its leaves. The active ingredients are the polysaccharides, particularly the acetylated mannans. Reports continue to reveal the healthful properties of these plant compounds.\*

Aloe vera gel supports the antioxidant activities of the body offering particular protection against free radicals that can damage our fragile DNA. Animal studies have shown that aloe may help enhance natural resistance to bacteria, parasites, and fungus including candida albicans.\*

### TruAloe Juice:

- Pressed only from inner leaf filet
- Superior to "whole leaf" products

### Why TruAloe® Is Superior

Once the biological properties of the gel were revealed, commercial methods of aloe preparation were shown to actually reduce or damage the natural make-up of aloe vera gel. We have improved the processing of aloe vera.

We begin with prime grade, freshly harvested organic aloe leaves. We remove the skin and sap, mill to a liquid, and process the gel with proprietary methods, which block the enzymatic breakdown of aloe. To ensure the safety of TruAloe, we implement a process called Flash Pasteurization. This quickly heats the product to eliminate any possibly harmful bacteria without denaturing the polysaccharides. Then it quickly cools to retain the aloe's nutritional quality. Our exclusive methods retain the integrity of the aloe gel. TruAloe is one of the few aloe drinks approved by the International Aloe Science Council who sets the standard for the aloe industry.
